Pairing Bluetooth Keyboard with iPad

Step 1: Toggle on the Power Switch. The Power and Bluetooth Indicators should be lit for approximately 5 seconds. The keyboard is now in idle mode. Press the Connect Button. Power Indicator should be lit and Bluetooth Indicator should be flashing. The keyboard is now in pairing mode.

Step 2: On the iPad, tap Settings. Find the Bluetooth setting, if Bluetooth is turned off, swipe to turn it on. The iPad should now be searching for all Bluetooth devices within range. Wait for Bluetooth Keyboard to appear under Devices.

NOTE: Depending on your operating system, your iPad’s set-up screen may differ slightly from what is pictured.

Using the Keyboard
Use Function Keys at the top of the keyboard to go to the iPad Home screen, show/hide on-screen keyboard, search for content (such as pictures, music, messages and contacts) and much more.

Preparing for Use
Please make sure both your iPad and the Bluetooth Keyboard are charged prior to proceeding. Before first use, please charge the keyboard with supplied USB cable for at least 3 hours.

NOTE: If you experience lag while typing, this is a sign your battery level is low and must be recharged.

1) When Power is ON, the blue Power Indicator will light up. When charging, the red Charge Indicator will light up. Once fully charged, the light will turn OFF.

The Bluetooth Indicator will flash blue for 5 seconds when searching for connection. Once connected, light will turn OFF.

NOTE: Not all Function Keys are compatible with all devices.
Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, can cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference, including interference that may cause undesired operation.

IMPORTANT NOTE: FCC Radiation Exposure Statement

1. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance.
2. This transmitter must not be co-located or operate in conjunction with any other antenna or transmitter.

Industry Canada Conformity

This device complies with RSS-Gen of the IC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference, including interference that may cause undesired operation.

Prop 65 Statement: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information on these regulations and a list of chemicals, log on to the following website address: http://www.ca.gov/oehha/prop65.html.
