Important Safety Instructions for Audio Products

- Read Thoroughly

When using electrical products, basic precautions should always be followed including:

1. **Read Instructions** - All the safety and operating instructions should be read before the product is operated.
2. **Retain Instructions** - The safety and operating instructions should be retained for future reference.
3. **Heed Instructions** - All warnings on the product and in the operating instructions should be adhered to.
4. **Follow Instructions** - All operating and user instructions should be followed.
5. **Cleaning** - Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
6. **Attachments** - Do not use attachments not recommended by the product manufacturer as they may cause hazards.
7. **Water and Moisture** - Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.
8. **Accessories** - Do not place this product on an unstable surface. The product may fall, causing serious injury to a child or adult and serious damage to the product. Use only with a stand, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.
9. **Transporting** - This product should be moved with care to avoid damage or injury.
10. **Ventilation** - Slots and openings in the cabinet are provided for ventilation, to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
11. **Power Sources** - This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operation instructions.
12. **Mains Plug** - The mains plug is used as the disconnect device. The disconnect device should remain readily accessible.
13. **Power - Cord Protection** - Power-supply cords should be routed so that they are not likely to be trapped in any way.
14. **Lightning** - For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.
15. **Power Lines** - An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep...
from touching such power lines or circuits as contact with them might be fatal.

16. **Overloading** - Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

17. **Object and Liquid Entry** - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. The apparatus should not be exposed to dripping or splashing, and object filled with liquids such as a vase of flower, should be placed on the apparatus.

18. **Servicing** - Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

19. **Damage Requiring Service** - Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   a. If the power-supply cord or plug is damaged.
   b. If liquid has spilled, or objects have fallen into the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
   e. If the product has been dropped or damaged in any way, and the product exhibits a distinct change in performance-this indicates a need for service.

20. **Replacement Parts** - When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

21. **Safety Check** - Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

22. **Heat** - The product should be situated away from heat sources such as radiators, heat registers, stoves or other products (including amplifiers) that produce heat.
Precautions

Safety Information-caution:
1. In order to shut off the power of this product completely, unplug the power cord from the wall outlet. Be sure to unplug the unit if you do not intend to use it for an extended period of time, such as on a vacation.
2. Use of controls, adjustments and performance of procedures other than those specified herein may result in hazardous radiation exposure.
3. To prevent electric shock, match wide blade of plug to wide slot, fully insert.
4. If this product develops trouble, contact qualified service centers, and do not use the product in defective states.

Safety Precautions

The light flash with arrowhead symbol, within an equilateral triangle, is intended to alert user to the presence of non-insulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

(See markings on the back of the unit.)
Before Use

1. Choose unit installation location carefully. Avoid placing it in direct sunlight or close to a source of heat. Also avoid locations subject to vibrations and excessive dust, cold or moisture. Keep away from sources that hum, such as transformers or motors.
2. Do not open the cabinet as this might result in damage to the circuitry or electrical shock. If a foreign object should get into the set, contact your dealer.
3. When removing the power plug from the wall outlet, always pull directly on the plug, never pull the cord.
4. Do not attempt to clean the unit with chemical solvents as this might damage the finish. Use a clean, dry cloth.
5. Keep this manual in a safe place for future reference.

How to Replace the Turntable Stylus (Needle)

Removing old stylus

1. Set a screwdriver at the tip of the stylus and push down in the direction “A”.
2. Remove the stylus by pulling it forward and down.

Installing a new stylus

1. Hold the tip of the stylus and insert the other edge by pressing in the direction “B”.
2. Push up in the direction “C” until it locks at the tip.
Product Overview

1. 45 RPM ADAPTOR
2. TONE ARM CONTROL INDICATOR
3. DECORATION (NOT FOR ADJUSTMENT TO TONE ARM)
4. TONE ARM
5. TONE ARM REST
6. SPEED CONTROL SWITCH
7. STYLUS
8. NEEDLE GUARD
9. TURNTABLE
10. ATMOSPHERE LIGHT
11. RCA LINE OUT CABLE
12. USB SLOT
13. AC POWER CORD
14. DUST COVER
PART I: Phonograph

1. Remove all the packing from the unit.

2. Connect the RCA line out jacks to auxiliary input sockets of your home amplifier device. Make sure to match the socket colors with the jack colors.

3. Connect the AC power cord to the household outlet. Then the atmosphere light will light blue all the time.

4. Put a record onto the turntable. Remember to use the 45 RPM adaptor located on the right top corner when playing a 45 RPM record.

5. Select the speed according to the record you are playing.

6. Lift and move tone arm to turntable, TONE ARM CONTROL INDICATOR will light up. Place tone arm on the edge of the record and the record starts playing.

**NOTE:**
You’re strongly recommended to play records with closing transparent dust cover to prevent dusts. Also, please don’t place anything on top of dust cover especially playing a record.

7. To pause or stop playing, you need to lift and move the tone arm back to the tone arm rest manually.

8. When the record reaches to its end, tone arm and rotation stop. Lift the tone arm and place it to tone arm rest manually.

9. Remember to cover the white plastic needle guard to protect the stylus and unplug the unit.
PART II: Audacity Software

The provided CD disc contains the following software:
(1) Audacity_for_MAC--------For Mac
(2) Audacity_for_WIN--------For Windows
The software is compatible with Window XP, VISTA, 7 and 8, and Mac.

NOTE:
- Read about Audacity on Windows 8, 7 and Vista. Windows 2000, NT, and 95 are not supported.
- Audacity for Mac is released as a Universal Binary. It runs on OS X 10.4 to 10.10.x. For lengthy multi-track projects, we recommend a minimum of 2 GB RAM and 2 GHz processor (4 GB RAM on OS X 10.7 or later).

Because of the variation of different operation systems, some of the interface may not be the same as below.

Audacity Installation and USB Connection

Connect one end of USB cable to the turntable and the other end into your computer. Then connect the AC power cord of turntable.

Audacity for Windows

Installing the Audacity Software

1. Please insert the Audacity software disk that comes with your unit. Go to My Computer - double click the CD ROM Drive.

2. Double click the audacity-win-2.1.0 to install the audacity software.

3. Select the setup language first and click on OK to continue.
Note: The language choice in the Windows EXE Audacity installer only selects the language for the installer.

4. The Audacity Setup Wizard will appear. Click on Next to install the software.

5. Continue to click on the Next buttons.
6. Click on the Install button to start installation.

7. Click on Next to continue.
8. Click on Finish to complete installation.

9. You can now open the Audacity software and start recording your files.

**Note**

1. Once you set up Audacity, you do not need to re-set it with each use.
2. "The Audacity-win-2.1.0.exe" (helpfile included) is available for Windows 8/ Windows 7/ Windows Vista/ Windows XP.
3. If you cannot run the exe document, please go to the website below and download the file from it directly.
4. Users upgrading to this release from Audacity 2.0.5 or earlier who had FFmpeg installed will see a notice that FFmpeg needs to be reconfigured. Please visit
   for a link to the recommended 2.2.2 version of FFmpeg for Windows and Mac OS X, and for information for Linux.
5. The Windows installer for 2.0.x versions will replace legacy 1.2.x or any previous 2.0.x installation, but install alongside legacy 1.3.x Beta versions. It is strongly recommended to uninstall previous Beta versions before installing current Audacity.
6. Audacity 2.1.0 requires the CPU to support the SSE2 (https://en.wikipedia.org/wiki/SSE2) instruction set which should be available on any Intel hardware produced after 2001 and any AMD hardware produced after 2003. To check what SSE levels your CPU supports, you can install CPU-Z (http://www.cpuid.com/softwares/cpu-z.html).

7. Users on Windows XP: You may see "Entry Point Not Found" when first launching Audacity after installation. This error occurs if you are running less than the latest "Service Pack" of updates for your Windows XP system. Please see http://manual.audacityteam.org/o/man/faq_installation_and_plug_ins.html#entry_point for how to install the latest Service Pack and for advice about the potential security risks of running XP now that Microsoft no longer supports it.

8. On first use of Audacity you need to confirm or cancel the Register Effects dialog for detected effects before you can launch Audacity. (For additional information, please visit the website at http://manual.audacityteam.org/o/man/effects_preferences.html#register)

Configuring Audacity for Microsoft Windows

Audacity Interface

![Audacity Interface Diagram](image)

Audacity Control Buttons
Use the attribute controls button at the top of the screen to go to beginning, Pause, Play, Stop, Record etc. Use the File, Edit, View, Transport, Tracks, Generate, Effect and Analyze menus to Save, Export, and edit the music.

1. Click the (●) button to pause the recording;
2. Click the (▶) button to play;
3. Click the (○) button to stop the recording;
4. Click the (▷) button to skip to start;
5. Click the (◁) button to skip to end;
6. Click the () button to record;
7. Adjust the input volume;
8. Adjust the output volume;

Audacity Preferences

1. Click the “Edit” on the Audacity interface, select “Preferences”.
In the pop-up window of the Audacity Preferences, tabs of Devices, Playback, Recording, Quality, Interface, Tracks, Import / Export, Extended Import, Projects, Libraries, Spectrograms, Directories, Warnings, Effects, Keyboard, Mouse and Modules are listed on the left side of the window as shown in the picture below.

2. Click “Devices” on the left side and detailed contents of the Devices will appear on the right hand side of the interface.
   Click the ▼ arrow on “Device” below Playback and choose “Realtek HD Audio output” or “Microphone Sound Mapper-Output”.
   Click the ▼ arrow on “Device” below “Recording” and choose “USB Audio Controller”.

14
Click the ▼ arrow on “Channels” to select “2(Stereo)” Do not click OK until you finish all of the settings.

**Note:** If you cannot find the “USB Audio Controller” in the Device list, close Audacity Software and re-open and try again.

Windows Vista and later call most USB external devices “microphones” but Windows XP and earlier do not. Some higher-end USB recording interfaces may appear as their explicit manufacturer’s name.

![Image of Preferences: Devices settings](image)

3. Click “Recording” on the left side and the detailed contents will display on the right side.
Click the checkbox beside “Software Playthrough: Listen while recording or monitoring new track”
Click the checkbox beside “Sound Activated Recording” and adjust the Sound Activation Level (dB) to -36.

**Note:** Once the “Sound Activated Recording” is selected, the Pause button will not work during recording. You can Click “Interface” on the left side to select Sound Activation Level.

![Image of Preferences: Recording settings](image)
4. Before exporting a MP3 file, you need to find ‘lame’ first. If the program does not show the MP3 library, make sure the Audacity driver disc is inside your computer. Click ‘Libraries’ on the left side, then in ‘MP3 Export Library’ interface, click ‘Locate...’ button to find ‘lame_enc.dll’.

5. You can download the ‘lame’ software from the website. Click ‘Download’ and a website will be opened automatically.

Open the website to download ‘lame_enc.dll’: click on LAME download page.
How do I download and install the LAME MP3 encoder?

Because of software patents, Audacity cannot include MP3 encoding software or distribute such software from its own web site. Instead, use the following instructions to download and install the free and recommended LAME third-party encoder to export MP3 files with Audacity.

**Windows**
1. Go to the external LAME download page
   - Click this link, do not right-click.
2. Directly underneath “For PPMpeg/LAME on Windows”, left-click the link Lame v.3.99.3 for Windows.exe and save the file anywhere on your computer.
3. Double-click “Lame v.3.99.3 for Windows.exe” to launch it (you can safely ignore any warnings that the publisher could not be verified).
4. Follow the setup instructions to install LAME for Audacity, making sure not to change the offered installation location of “C:\Program Files\LAME for Audacity” or “C:\Program Files (x86)\LAME for Audacity” on a 64-bit version of Windows.

You should now be able to export MP3's without any further configuration, choosing File 3 Export Audio, then selecting “MP3 Files” in the Export Audio dialog.

**Troubleshooting**
Occasionally, there may be a conflict where Audacity still tries to detect the path to an older lame_enc.dll file. To correct this:
1. Ensure there are no older versions of lame_enc.dll in any locations where Audacity detects it, namely:
   - C:\Program Files\LAME for Audacity\ or C:\Program Files (x86)\LAME for Audacity (this is where the installer puts the .dll)
   - the Audacity installation folder (usually C:\Program Files\Audacity or C:\Program Files (x86)\Audacity), or \LAME\bin folder inside that.
2. Exit Audacity and navigate to the audio\preferences file at:
   - Windows Vista/7: Documents and Settings\username\Application Data\Audacity\preferences
   - Windows XP: Documents and Settings\username\Application Data\Audacity\preferences
3. Open preferences.cfg in a text editor such as Notepad, and delete the line starting with “[MP3]”
4. LAME\libpath:
   - Save the changes to preferences.cfg and restart Audacity.

Jump straight to Windows download in the top line. Left click 'Windows download' and it will jump to the download chapter for Windows.

Click Here, Windows User — Jump straight to Windows downloads
Click Here, MAC OS X User — Jump straight to MAC OS X downloads

Audacity LAME is free, so you can click 'libmp3lame-win-3.99.3.zip' under ZIP OPTION to download. Click Save, select the Folder you want to save it in, then click Save again to save it.

**TO DOWNLOAD Lame and Ffmpeg for Windows, click links BELOW:**
If Audacity does not detect LAME, download the ZIP option, extract the files inside to a well known folder, then open Audacity, go to Library preferences and configure it to search on the well known folder you extracted the files to.

**NOTICE:** As of 2014 June 27 Clam AntiVirus is showing a false positive for Lame_v3.99.3_x86.exe - Thanks user J.Garcia for contacting me. FILE IS SAFE, but always check your downloaded files with www.virustotal.com.

Close the webpage, then click OK to close the Audacity preference. Minimize Audacity interface, then open the Folder where you saved the libmp3lame-win-3.99.3. Double click on it, then double click on it again to open. Now left click on lame_enc.dll. Hold and drag it to your Desktop.

**NOTES:**
- Once you move it to the Desktop you do not need to do this again.
- After opening lame_enc.dll the first time it may not be necessary to open lame_enc.dll the next time you record.

Go back to Audacity and click on Edit, then Preferences. Click on Libraries in MP3 library. Click on Locate, then click on 'Browse' Click on Desktop, then click on Lame_enc.dll to highlight it. Then click Open.
Click on OK on locate Lame box. Click OK on Audacity Preferences to close and to complete your settings. Now you can Record, Export and save your favorite music.

6. For detailed information about how to run this program, please click "Help" and click "Manual (in web browser)".

7. Adjust the output and input volume to 20% (or 0.2 level).

*NOTE: Because of the variation of different operation systems, the input volume control may not work on some individual Windows versions. Windows Vista is recommended to ensure the input volume control works properly.*

For any queries in regard to 'Mixer Toolbar#please visit:

**RECORDING OPERATION**

To download music and save into computer:
1. Place the record on the turntable.
2. Move the tone-arm over to the record to start playing.
3. Click the Record (      ) button to start recording.
The waves (left and right tracks) will show on the interface.
4. At end of a song, click the “pause” (  ➫  ) button on the computer and press the Stop button on the turntable, move the cursor to the wave area and left click at the end of the song. For the next song, replace the album or move tone-arm to another desired song. Press the Play button on the turntable to start playing the next song. Immediately press the “pause” (  ➫  ) button on the computer and downloading will continue and another R/L track will appear on the interface.

NOTE: Pause button will not work during the recording process if the ‘Sound Activated Recording’ in Preferences Recording is selected. Clear the checkbox next to ‘Sound Activated Recording’ if you want to manually pause recording.

5. Repeat steps 3 and 4 until you have finished downloading.

NOTE: Do not click stop button on the computer when continuously downloading songs. Remember to click pause button in between your desired songs. Press stop button on the computer only when all your desired songs have been downloaded.

After your have finished downloading, you may play back the songs through your computer. In stop mode, simply click (  ➫  ) SKIP TO START button and then the (  ➫  ) PLAY button.

TIP: If you press the “stop” button by accident, you can click “Transport” and click “Append Record” and you can continue to record in the same track.

For example, if the “stop” button has been pressed by accident at the end of the first song, do not click anything in Audacity. Prepare another song, click “Transport” tab and select “Append Record”. The second song will continue to record on the same track at the end of the first song.

You now have a music download on your computer but the music needs to be saved and converted to WAV, OGG, or MP3 formats before exporting.

GENERAL PROBLEMS FOR WINDOWS VERSION

1. If you do not have the fluctuating wave on the interface during recording, or the recording sounds unsatisfactory, adjust the recording volume as follows:

• Click Start in the left corner of the computer, select Settings, Control Panel.
In Control Panel interface
Find Sounds and Audio Devices. Double click the icon to enter Sounds and Audio Devices Properties interface.

In Sounds and Audio Devices Properties interface
Volume window will display, select the Audio tab to reveal the settings.
In Sound recording, select USB Audio Controller and click the Volume button to set the recording input level. The WAVE IN window will appear.
• In WAVE IN interface
Adjust the recording volume to about 50% as per illustrated below. The fluctuating wave will show on the interface when recording.

2. If you do not hear any sound when the turntable is connected and you wish to listen to the music and/or video, it is possible that the default playback device has been changed to USB Audio Controller when the turntable connects to the PC.
Recommended: Remove the USB cable from the PC.
Alternative: This solution requires you to change the setting manually every time you connect the USB cable to the PC.
Change the setting as follows:

- **For Vista and Windows 7 users:**
  Click “Start” and go to the Control Panel. Find and click “Sound” icon. Sound window will be opened and the “Playback” window will be seen. You will see that the Speaker USB Audio Controller is set as default. To ensure the sound, click a playback device (e.g., Speaker High Definition Audio), then click “Set Default” and click OK. The sound should now work.

- **For Other Windows versions users (e.g.: Windows XP):**
  Click “Start” and find “Settings”, “Control Panel”. In the Control Panel window, find and double click into “Sounds and Audio Devices”. In the Sounds and Audio Devices Properties window, Volume window will be seen. Click the “Audio” tab to reveal the settings. In the Sound playback section, you will see that the USB Audio Controller is selected. To enable the sound, click the pull-down arrow and select your inbuilt sound device or sound card by name as the playback device (e.g., Realtek) and click OK and the sound should be enabled.
DIVIDING TRACKS

After you have finished downloading, you may play back the songs through your computer before exporting. In stop mode, simply click the SKIP TO START button and click then the PLAY button.

1. Press ( ) button to return to the beginning of the first song.
2. Move cursor to the wave graphic area, left click mouse and hold then drag from left to right. Release the mouse when the highlight reaches the end of the first song.

3. Click "File" tab then select "Export Selected Audio...".

4. In the next window, select a location as well as the format (most people prefer to save audios in MP3 format (MP3 format is most common)) in My Music and put the title in the file name. Click Save!

**NOTE:** The most common formats are: MP3, WAV (WAV uses a lot of space), and MYA/AAC (most iPod devices can play audios with this format). You can also choose alternative formats such as AIFF, WAV, OGG or FLAC if these formats are
supported on both your computer and the exported devices. Note that according to your selection, the Edit Metadata window may not appear.

5. In the next window, fill in the information in the window entitled “Edit Metadata”. Then click “OK”.

Wait a few seconds before exporting the selected audio.
Second song to be divided and saved:
1. Move cursor to the wave graphic at the beginning of the second song. Left click mouse and hold then drag from left to right until you reach and highlight the end of the second song.
2. Click "file" tab then select "Export Selected Audio...".
3. Follow above steps to divide songs, export and save, one-by-one.

**MP3, WAV AND OGG FORMAT**

These are digital file formats for audio (music) and most current computers are compatible. However, if you copy the file onto a CD disc (CD-R or CD-RW) and play with another CD player, you have to make sure the CD player supports those formats; otherwise, the copied CD disc will not play. The same thing is true with a copied file to be played on another MP3 player.

**EXPORT AND SAVE FOR WAV AND OGG FORMATS**

(AFTER RECORDING IS COMPLETE)

When the song is finished, click ( ) on the screen to stop playing.
You can export and save tracks individually, or export and save into one file.

To export and save individually:
1. Highlight the song that you want to save then click the file tab on the Audacity interface.

2. Select "Export Selected Audio...", a window will appear as below:
Select the folder, put title in the file name and click the pull-down arrow to select a save type, such as WAV or OGG format.

3. Choose the file format of the recording that should be exported and put in the title in the file name and the folder of the location where it will be saved, i.e. desktop. Then click “Save”.

4. Edit Metadata window may appear, complete the information then press the OK button.

5. Wait for a few seconds until the export & saving is completed.

**Setting the language**

1. Click Edit and select Preferences.
2. Another window titled with Audacity Preferences will appear. Click the Interface tab and click the pull down arrow to select the language you wanted.
3. Then click OK to close the window. The new setting will only be active in the next start - that means you need to close the Audacity and re-open the software again.

AUDACITY FOR MAC USERS

System Requirements
Audacity for Mac is released as a Universal Binary. It runs on OS X 10.4 to 10.10.x.
For lengthy multi-track projects, we recommend a minimum of 2 GB RAM and 2 GHz processor (4 GB RAM on OS X 10.7 or later).

1. Please insert the Audacity software disk that comes with your unit. Click the Audacity disk on the desktop.

2. Select Audacity_for_MAC for Macintosh system.

   - Audacity_for_MAC
   - Audacity_for_WIN
   - audacity-win-2.1.0.exe
   - AUTORUN.INF
   - easymp3gain-0.5.0.src.tar.gz
   - The GNU General Public License.html

TIPS: To check your computer OS version, you can click the Apple icon then select "About This Mac".
The next window will display and the processor type and the OS version will display as below.

3. Double click on the "PPC" folder.

4. Then double click "audacity-macosx-ub-2.1.0.dmg".

Wait a few minutes until this window disappears.

Then another window will appear.
Drag the "Audacity" folder in to "Applications" as the instruction show on the window.

5. Double click the Audacity folder and in the Audacity window, files will be displayed in the folder.

6. Double click the Audacity icon to start the software running, alternatively, drag the "orange ball wearing headphones" icon down onto the desktop toolbar. Click on this icon to run Audacity.
CONFIGURING AUDACITY FOR MAC

Audacity Interface for Mac

Audacity Interface—Settings and controls
At the top of the main Audacity window, to the right of the play control buttons, you will see the input and output level meters (labeled L and R). Under the output level meter, is an icon that looks like a microphone. Next to the microphone is a black arrow that points down. Click this arrow and select Start Monitor. (If you do not see the input and output level meters, open your Preferences again as described above.)
AUDACITY CONTROLS AND BUTTONS

Use the attribute control button at the top of the screen to go to Beginning, Play, Record, Pause, Stop and End. Use the File, Edit, View, Transport, Tracks, Generate, Effect and Analyze menus to Save, Export, and Edit the music.

1. Click the ( ) button to pause the recording;

2. Click the ( ) button to play;

3. Click the ( ) button to stop the recording;

4. Click the ( ) button to skip to start;

5. Click the ( ) button to skip to end;

6. Click the ( ) button to record;

7. Input level monitor
8. Output level monitor
9. Input device
10. Output device
11. Adjust the input volume.
12. Adjust the output volume.
AUDACITY PREFERENCES SETTINGS

A few settings will be required before you download the music.

1. Click “Audacity” on the Audacity interface, select “Preferences” and another window will appear on the screen.

2. In the window of Audacity Preferences click “Devices” on the left hand side.
Then on the right side within the Recording Device column, set Device to “USB Audio Controller”,
Channels to “2(Stereo)”.
NOTE: If you cannot find the “USB Audio Controller” in the Device list, close the Audacity
Software and re-open and try again. Ensure that the turntable is connected to the computer.
3. Click “Recording” on the left. Then on the right side in Playthrough column, click the checkbox beside “Software Playthrough: Listen while recording or monitoring new track”. In the Sound Activated Recording column, click the checkbox beside “Sound Activated Recording”, then slide the meter to -36 db.

NOTE: Once the “Sound Activated Recording” is selected, the Pause button will not work during recording.

4. Click “Quality” on the left then on the right side in the Sampling column, select “44100 Hz” in Default Sample Rate and select “16-bit” in Default Sample Format.
5. Click “Libraries” on the left then on the right side in MP3 Export Library column, check if the program has detected and shown the MP3 Library Version there. If shown, skip and forward to step 6.

If “MP3 export library not found” is displayed, you must find the “LAME”. Click “Locate...” button then a window named “Locate Lame” appears to find where the “LAME” is. Click the “Browse...” button to find it.
If you cannot find it or the LAME file you found is not compatible, click the “Download” button and a website will show automatically. Scroll down the webpage to find a title named “Mac OS X”. Click the LAME download page! and another website will show automatically.

**Mac OS X**

On OS X 10.6 or later, Administrative (and occasionally, root) permissions may be needed on some machines to read the LAME library the installer places in /usr/local/lib/audacity.

In case of difficulty, please download the zip version “Lame_Library_v3.98.2_for_Audacity_on_OSX.zip” from “Alternative zip download for Lame 3.98.2” below and follow the instructions.

= Installer

1. Go to the external LAME download page.
2. Download Lame Library v3.98.2 for Audacity on OSX.dmg.
3. When you have finished downloading, double-click the .dmg to mount it, then go to the Finder (in Safari, the “Lame Library v3.98.2 for Audacity” virtual disk image will be extracted and mounted automatically after downloading).
4. Double-click “Lame Library v3.98.2 for Audacity.pkg”; the standard OS X installer will start.
5. Click through the steps in the installer, accepting the defaults in all cases; this will install the LAME binary “libmp3lame.dylib” in /usr/local/lib/audacity.
6. Audacity should detect LAME automatically when you export as MP3. If Audacity cannot find LAME:
   1. Click Audacity > Preferences then choose “Libraries” on the left.
   2. Click “Locate...” under “MP3 Export Library”, then “Browse...” in the “Locate Lame” dialog.
   3. The “Where is libmp3lame.dylib?” window will open at /usr/local/lib/audacity; select “libmp3lame.dylib”, click “Open” then “OK” and “OK”.

Find and click the "MAC OSX downloads"

[Click Here, Windows User —> Jump straight to Windows downloads]
[Click Here, MAC OSX User —> Jump straight to MAC OSX downloads]

Scroll down the webpage.

**For FFmpeg and LAME on Mac OSX click below:**

If Audacity does not detect FFmpeg, download the ZIP option, extract the files inside to a well known folder, then open Audacity, go to Library Preferences and configure it to search on the well known folder you extracted the files to.

For Audacity 1.3.3 or later on Mac OS X 10.4 and greater (Intel or PPC), and Audacity 1.2.5 on OS X 10.6 and later (Intel or PPC) (THIS IS NOT LAME!): FFmpeg 2.2.2 ZIP for Audacity 2.0.6 or later on OS X 10.4 and later (Intel or PPC) (THIS IS NOT LAME!): FFmpeg Binary for Audacity 1.3.13 to 2.0.5 ONLY (see previous link for 2.0.6) OS X 10.4 and later (Intel or PPC)

You will notice a form showing the LAME for all version systems. Find a title named For Audacity 1.3.3 or later on Mac OS X 10.4 and greater (Intel or PPC), and audacity 1.2.5 on OS X 10.4 and later (Intel)! and then click Lame Library v3.98.2 for Audacity on OSX.dmg! or "here" to download the file. Then locate LAME and click OK.
6. Click OK to close the Preferences interface.

**SETTING THE RECORDING INPUT LEVEL**

It is recommended that the recording input level is adjusted prior to starting to record. Slide the output level to about 0.5, slide the input level to 0.3, then get your record ready.

**RECORDING OPERATION**

To download music and save into computer:

1. Place the record on the turntable.
2. Move the tone-arm over to the record to start playing.
3. Click the Record ( ) button to start recording.

The waves (left and right tracks) will show on the interface.

4. At end of the song, click “pause” ( ) button on computer and press Stop button on turntable, move cursor to the wave area and left click at the end of the song.

For the next song, replace the album or move tone-arm to another desired song. Press Play button on the turntable to start playing the next song. Immediately press “pause” ( ) button on computer and downloading will continue and another R/L track will appear on the interface.

**NOTE:** Pause button will not work during recording process if the ‘Sound Activated Recording’ in the Preferences Recording is selected. Clear the checkbox next to the ‘Sound Activated Recording’ if you want to pause recording manually.
5. Repeat steps 3 and 4 until you have finished downloading.

**NOTE:** Do not click stop button on computer while continuously downloading songs. Remember to click pause button in between your desired songs. Press stop button on the computer only when all your desired songs have been downloaded.

After your have finished downloading, you may play back the songs through your computer. In stop mode, simply click () SKIP TO START button then the () PLAY button.
DIVIDING TRACKS

1. Press ( ) button to return to the beginning of the first song.
2. Move cursor to the wave graphic area, left click the mouse and hold then drag from left to right. Release the mouse when the highlighter has reached the end of the first song.
3. Click "File" tab then select "Export Selected Audio...".
4. The window will pop up a dialog box for you to complete the Metadata. Click OK button when completed.

5. Then a window appears, select your music file location and format and type in your file name. Click "Save" and the song is saved on the computer.
6. Edit Metadata window will appear. Complete the information then click OK. Wait for a few minutes until the saving is complete.

**EXPORT AND SAVE FILES (AFTER RECORDING IS COMPLETED)**

- When the recording is finished, click the ( ▪️) on the screen and stop the cassette playback.
- You have a music download on your computer now.
- You may play back the song through your computer.
- Simply click the ( ▶️) to play.

1. To export and save individually, click the “File” tab on the Audacity window then select “Export Selected Audio...”. 
To export and save into one file, click the "File" tab on the Audacity window then select "Export Audio".

2. A window will pop up after clicking Export. It will default to the MP3 format, but you also can select other formats by clicking the arrow located at the right of the MP3 Files.
3. Complete the "Save As" and Save-in location, click the Save button and the Edit Metadata window will display. Complete the information if necessary then click OK and wait a few minutes until it is finished saving.
TROUBLESHOOTING GUIDE

If you experience any problems with your unit, kindly consult the following guide prior to calling your dealer.

NO SOUND:
• If you are not getting any sound into the software application, go back to the preferences as shown above and make sure that you have selected the USB Audio Controller for the recording device in the devices.

• Power Cycle: Close Audacity, turn off the turntable, unplug the USB Cable. Then plug in the USB Cable, turn on the turntable and reopen Audacity.

• If you are not able to hear any audio as you play the record, please click on the microphone drop-down arrow and select Start Monitoring. This will enable you to hear the audio from the turntable, even if you have not record-enabled the Audacity application.

Check the microphone slider to make sure that it is at full volume, all the way to the right as shown below. If you find the recording sounds low or distorted, adjust the microphone slider.
If you still do not have the fluctuating wave on the interface during recording, or the recording sounds unsatisfactory, adjust the recording volume as follows:
Click the launchedpad icon.

Then find "System Preference" and double click it.

In the new interface, find the "Sound" icon and double click it.

Adjust the Output volume under "Sound Effects"

Under "Input", select "USB Audio Controller" and adjust the "Input volume"
POOR SOUND QUALITY:

- Check your stylus to make sure it is secured to the tone arm. The stylus must be connected to the tone arm whenever using the turntable.

- Make sure that your RCA plugs are plugged into a source or not touching bare metal. If you are experiencing noise through the USB, you may have interference from the RCA plugs. Ensure the USB cable is not touching or near any other cables.

- If you experience any odd sounds coming from the recording, try closing all applications and restarting the computer. Only run Audacity while recording.
**Specification**

**PHONOGRAPH section**
- Motor: DC servo motor
- Drive system: Belt drive
- Speeds: 33-1/3 rpm, 45 rpm and 78 rpm
- Wow & Flutter: Less than 0.25% (WTD)
- S/N ratio: More than 35 dB
- Cartridge type: Ceramic stereo cartridge
- Stylus: ITRRS-300
- Output level: 160-380 mV (5 cm/sec at 1 KHz)

**GENERAL**
- Power requirements: AC 120 V ~ 60 Hz
- Power consumption: 5 W
- Dimensions (WxHxD): 390 x 117 x 330 mm
- Weight: 2.715 kg (approx.)
- Standard accessories: Instruction Manual, A Disc for Audacity Software Driver, USB Cable
FCC Statement

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CALIFORNIA PROP 65 WARNING

"WARNING" This product contains chemicals known to the State of California to cause birth defects or other reproductive harm. For more information on these regulations and a list of chemicals, log on the following website address:
http://www.oehha.ca.gov/prop65.html
Innovative Technology Electronics Corp.
Limited Warranty: 90 Days Labor, One Year Parts

Innovative Technology Electronics Corp. (IT) warrants the product to be free from “Defects” in materials under normal use for a period of “One Year” from the date of the original purchase. The Warranty is “Not” transferable. IT agrees, within the initial “90 Day” period, to repair or replace the product if it is determined to be defective at “No Charge”. It is further agreed that IT will cover the cost to repair or replace damaged “Parts” only for a total period of “One Year” from the date of the original purchase. The warranty does not cover cosmetic damage, antennas, AC cords, cabinets, headbands, ear-pads, or damage due to line power surges, connection to improper voltage supply or settings, misuse, mishandling, accident, acts of God or attempted repair by an unauthorized service agent.

To obtain service, the purchaser MUST present an original sales receipt / proof of purchase. Please contact us at www.ithomeproducts.com to request an RMA (Return Material Authorization) number to return products for service or replacement. Returns without an RMA number on the package will be refused and returned to sender. Upon receipt of the returning item and our full inspection (IT) may issue a replacement to customer for the same item or of one that has equivalent value and features. To return an item, supply full name, return address, phone number, item purchased, receipt of purchase and reason for return to obtain RMA number.

All returns must be in the original packaging or reasonable substitute to prevent damage. Customer “Must” include full name, shipping address and telephone number inside of package. No return will be shipped back to a PO Box or APO address. Please include your check or money order in the amount of

- USD$5.00 for items $10.00 to $39.99 (Price Paid Per Unit)
- USD$10.00 for items $40.00 to $99.99. (Price Paid Per Unit)
- USD$16.00, for items $100.00 and up. (Price Paid Per Unit)
- Shipping fees are non-refundable

to be payable to Innovative Technology Electronics Corp.(for handling and return shipping charges) (IT) will not be responsible for delays or unprocessed claims resulting from a purchaser’s failure to provide any / all of the necessary information.
