Troubleshooting

Alarm doesn’t sound or only makes a “clicking” sound when activated.
Check battery life and replace the batteries if necessary. If battery life is OK, Remove and refit batteries to reset.

The steel cable will not totally retract back into the main unit whilst pressing the cable trigger button gently pull some of the cable out again and then allow it to retract back slowly into the unit. Repeat several times if necessary pulling out less cable each time.

Using Personal Alarm

1. To activate the unit:
   ▪ Remove the tag.

2. To operate the unit:
   ▪ (1) To trigger the alarm, Just pull out the strap.
   ▪ (2) To use as Light, Just press the button.

3. To replace batteries:
   ▪ Replace with x 4 LR41(392) batteries.
   ▪ Cover the back cover.

Security Lock top view

3. Press and firmly hold the Combination set button located next to the cable. Enter the new combination. Press and hold the release button until you have set all your combination dials to the new code.
4. Release the combination set button, or pull the cable plug head up, to save the new combination.
5. Record the combination in a secure space provided at the user manual or another easy-to-find place.
6. Test the combination BEFORE attaching the lock to an item.

Unlocking the Laptop Lock

1. Using the dials, enter the current combination.
2. Press the release button to release the plug head.
3. Retract the cable by pressing and holding the trigger while guiding the cable into the unit.
