SAFE & SOUND Model No. ITSS-9500

LAPTOP LOCK/ALARM

The Laptop Lock/Alarm is designed to help protect your valuable possessions from theft in 2 ways: (1) If the cable is cut, or, (2) if the motion sensor is set the alarm will also sound if there is any movement of the lock.

Battery Installation: The Laptop Lock/Alarm requires four LR44 (1.5 volt) batteries. For security, the battery cover can only be opened when the unit is in the "unlocked" mode. Firstly set the dials to the correct combination code (the factory preset is 0-0-0). Then push down the Lock Release Button and hold down. At the same time push the battery cover up, as shown on figure 1 below. Insert the batteries into the compartment and then replace the battery cover. You will need to once again hold down the Lock Release Button while you slide the battery cover back in place. Let go of the Lock Release Button and ensure the battery cover is secure.

Using the Laptop Lock/Alarm

With the Laptop Lock/Alarm in the "unlocked" mode, press the Cable Trigger Button and pull out as much steel cable as required. Guide the cable around the item(s) you wish to protect and preferably also an immovable object such as a post or railing (to prevent your items from being easily snatched by a thief). Insert the plug end of the cable into the lock hole on the top of the unit and firmly push down until it clicks in place. Turn the dials to scramble the combination. If the motion sensor feature is required, after locating the unit press the Motion Sensor Activation Button on the front of the unit. The LED light will begin flashing and the unit will also start "beeping". You have approximately 5 seconds to leave the Laptop Lock/Alarm and your item(s) combination. The alarm doesn't sound or only makes a "clicking" sound when activated using just one hand). This will start the alarm sounding. The alarm will continue to sound even when the user stops pressing the sides of the Personal Alarm. To stop the alarm sounding push the "off" button at the bottom of the Personal Alarm.

Battery Replacement: Remove the four small screws on the back of the Personal Alarm using a small cross head screwdriver. Gently remove the cover to access the battery compartment. Remove the existing batteries and replace with 3 new LR44 (1.5v) batteries, ensuring the correct polarity and the batteries make good contact with the terminals. Replace the back cover and tighten the four screws.

Troubleshooting:

Alarm doesn't sound or only makes a "clicking" sound when activated

Check battery life, and replace batteries if necessary. If battery life is OK, remove and reinsert batteries. Push the "off" button at the bottom of the Personal Alarm. To stop the alarm sounding press both sides simultaneously.

Using the Computer Slot Adapter

To enable you to secure a laptop computer you will require the Computer Slot Adapter. Firstly locate the security slot on your computer (this is normally located on the side or back of the computer). Turn the flattened end of the adapter until it springs partially out of the cylinder. Slide the small "T" shaped end of the adapter into the security slot on your computer until it has pushed in as far as it will go. Rotate the adapter 90 degrees so the "T" shaped end engages in the security slot and the adapter cannot be pulled out. Push in the flattened knob of the adapter (ensuring the prongs at the other end slide into the security slot) and turn 180 degrees until the holes in the side of the adapter are aligned. Thread the steel cable of Laptop Lock/Alarm through the holes in the computer slot adapter and loop the cable around an immovable object such as the leg of a heavy table, before locking the end of the cable in place. See "Using the Laptop Lock/Alarm" section.

Low Battery Indication and Power Saving

The LED will normally flash a red color, however if the battery condition is low the LED will flash yellow. When battery level is low replace batteries immediately before using. To conserve batteries, when not in use always unlock the unit and unplug the cable end from the lock hole.

Using the Personal Alarm

In an emergency or panic situation, simply push both sides simultaneously (similar to a squeezing action if using just one hand). This will start the alarm sounding. The alarm will continue to sound even when the user stops pressing the sides of the Personal Alarm. To stop the alarm sounding push the "off" button at the bottom of the Personal Alarm.

Battery Replacement: Remove the four small screws on the back of the Personal Alarm using a small cross head screwdriver. Gently remove the cover to access the battery compartment. Remove the existing batteries and replace with 3 new LR44 (1.5v) batteries, ensuring the correct polarity and the batteries make good contact with the terminals. Replace the back cover and tighten the four screws.

Limited Warranty: 90 Days Labor, One Year Parts

Innovative Technology Electronics Corp. (IT) warrants the product to be free from "Defects" in materials under normal use for a period of "One Year" from the date of the original purchase. The Warranty is "Not Transferable." IT agrees, within the initial "90 Days" period, to repair or replace the product if it is determined to be defective at "No Charge." IT is further agreed that IT will cover the cost to repair or replace damaged "Parts" only for a total period of "One Year" from the date of the original purchase. The warranty does not cover cosmetic damage, antennas, AC-cords, cabinets, head-sets, ear-pads, or damage due to line power surges, contact to improper voltage supply or settings, misuse, mishandling, accident, acts of God or attempted repair by an unauthorized service agent. To obtain service, the purchaser MUST present an original sales receipt / proof of purchase. Please contact us at www.ithomeproducts.com to request an RMA (Return Material Authorization) number to return products for service or replacement. Returns without an RMA number on the package will be refused and returned to sender. Upon receipt of the returning item and our full inspection (IT) may issue a replacement to customer for the same item or one of an equal value and features. To return an item, supply full name, return address, phone number, item purchased, receipt of purchase and reason for return to obtain RMA number. All returns must be in the original packaging or reasonable substitute to prevent damage. Customer "Mail" include full name, shipping address and telephone number made of package. No return will be shipped back to a PO Box or APO address. Please include your check or money order in the amount of:

- USD$0.00 for items $10.00 to $39.99 (Price Paid Per Unit)
- USD$10.00 for items $40.00 to $99.99. (Price Paid Per Unit)

OR CONSEQUENTIAL DAMAGES FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON THIS PRODUCT EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW. ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ON THIS PRODUCT IS LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above exclusions or limitations may not apply to you. This warranty gives you specific legal rights and you may also have other rights, which vary from state to state.
